

Did you receive money back on your workers' comp premium last year?

Now you are eligible through the Health First Network Workers' Compensation Program.

Since the rates for workers' compensation insurance are set by the state, prices are the same no matter where you secure coverage. **But now, you are eligible for this 30% dividend**, which effectively reduces the true cost of coverage. For example:

- \$10K premium has returned an average dividend of 30%, or \$3,000
- \$5K premium has returned an average dividend of \$1,500
- \$2K premium has returned an average dividend of \$600

Other programs may offer similar dividends on an individual basis, but our program is based on the group's experience and not the individual's experience. This provides a better chance to not only receive the dividend, but to receive a higher dividend.

AmTrust North America (formerly Comp Options) is a true partner to the Health First Network and Danna-Gracey, and now, through the resources of AmTrust - rated "A" (Excellent) by A.M. Best - we are able to provide this exclusive enhanced dividend program that is like no other for Florida physicians and medical practices. To date, these programs have given back over \$8 million in dividends to Florida medical society members insured through these programs.

For more information on the workers' compensation insurance program, fax your information below or call Julie Danna at **850.530.3924**.
