

**Baptist Medical Park (BMP)
9400 University Parkway, Pensacola FL**

This delineation of services performed at Baptist Medical Park (BMP) is being provided to further clarify the variety of services offered within this complex and applicable deductible charges and co-pays that may be incurred.

Baptist Medical Park houses two (2) separate and distinct facilities.

Within BMP there is an Ambulatory Surgery Center, known as **Baptist Medical Park Surgery Center**. This center performs minor surgeries and surgical diagnostic procedures such as colonoscopies. The Surgery Center at BMP also performs some diagnostic procedures, but only if related to a surgical procedure being performed in the center. Any procedure performed at the Ambulatory Surgery Center is not subject to the hospital deductible, but is subject to the all applicable co-pay amounts as described in your summary of benefits.

Baptist Hospital also has an outpatient hospital facility in BMP. Known as **Baptist Med Park/Baptist Hos**. This hospital portion of the facility performs outpatient lab, imaging and diagnostic procedures (including mammograms); outpatient cardiac services; and outpatient physical therapy, speech therapy, and occupational therapy. Any service performed at this outpatient facility will be subject to the applicable hospital deductible and outpatient co-pay amounts as described in your summary of benefits (routine, wellness mammograms are not subject to a co-pay or deductible).

*There is also a Baptist Medical Park in Navarre that offers the same services.
